# Review Packet for Pre-K2

Assallamu Alaykum - This packet is designed to be used as a review of the concepts that the students learned through out the year in Pre-K2. After several months off from school it is easy for the students to forget some of what they have learned, especially if it is not reinforced – reviewed on a regular basis. Not everything that we have studied through out the year is covered in the review packet but the major concepts are. This packet is to aid you, the parent, in helping to further prepare your child for kindergarten. Remember, learning does not end just because the school year has. Please review but introduce your child to new concepts too.

Other stuff:

Sorting – give your child items to sort – let him/her figure out how to sort it i.e. size, color, shapes, similarities etc…coins, dry cereal, dried pasta and beans, beads, buttons are some things that you can use. These are just a few suggestions.

Opposites – this is something that you can do orally – say a word and have your child give its opposite

Practice beginning and ending word sounds

Identify 3 and 4 letter words – words that can be "sounded" out

It's not too early to introduce your child to the value of coins – a penny and its value a nickel and its value, ect.

InshaAllah, the students will learn to tell time in Kindergarten!

These suggestions are meant to supplement your teaching.

Please do not limit yourself to only what is mentioned in this packet.
